### ABOUT ME

---

I really love programming and technologies and i think i'm ready to be a part of a great team as a junior developer and give my best, i'm flexible and have a lot of energy to keep learning like everybody does when you got a purpose, work hard with passion and responsibly like all of things i've done in my life.

As a Fullstack developer, i prefer both frontend and backend, i really like working with JavaScript (libraries, framework (Reactjs and Nodejs), and i keep learning everyday. based on my past experience into the programming world, i manage good logic and work under pressure, i'm creative and with a positive mentality to resolve problems.

The most of times i have worked independently, but i'd like to be a part of a work team and i know it would be nice for me and other based my communication skills in other jobs, friends and people in everywhere.
