PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years of experience building scalable web applications with React, Next.js, TypeScript and GraphQL, specializing in multi-brand iGaming platforms for regulated markets. Leads the frontend team through critical releases and mentors junior developers. Evolved an Nx monorepo, migrating API services from REST to GraphQL and turning complex features into shared packages reused across brands, and owns key player-facing features such as the cashier, bonuses and notification center. Experienced with Node.js and open to full-stack roles. Fluent in English and Spanish.

WORK EXPERIENCE

United Remote — Ta' Xbiex, Malta

Senior Frontend Developer | May 2026 – Present

- Lead the frontend team through critical releases and improve workflows such as the release process, code review and performance.
- Work on and enhance our Nx monorepo: migrated the frontend's API services from REST to GraphQL into the monorepo, and did the same with complex components such as the game player, notification center and terms & conditions flow, publishing them as shared packages reused across casino brands.
- Own complex player-facing features for multiple online casino brands serving the German, Finnish, Canadian and Arabic markets, including the cashier / fiat deposit flow, player bonuses, notification center and promotions page.
- Built OTP verification for registration and profile forms (phone and email flows) and a country-based registration restriction driven by compliance requirements.
- Designed an app-wide user data layer, prefetched on the server and shared through the SWR cache, to remove duplicate API requests across components.
- Diagnosed and fixed production issues, including a WebSocket (MQTT) keepalive race condition causing disconnects, unexpected logouts from auth cookie expiry, and stale Next.js Router Cache data on locale switch.
- Mentor junior frontend developers through code reviews, pair programming and technical guidance.

Frontend Developer (React / Next.js) | Apr 2025 – May 2026

- Developed customer-facing features for multiple casino brands using React, Next.js, TypeScript, GraphQL, Redux Toolkit and Tailwind CSS in an Nx monorepo, with server-side rendering.
- Built and maintained reusable components in the shared Casino UI and Core libraries used across brands.
- Integrated GraphQL and REST APIs, including data fetching and caching with SWR, error handling, CMS content from Directus and internationalization with next-intl.
- Built responsive, art-directed banner components and carousels using Next.js image optimization.

Tecnosurca (clients: Limonbyte, Hidroagua C.A.) — Aragua, Venezuela (Remote)

React Native & React Developer (Freelance) | Jun 2024 – Nov 2024

- Developed a React Native mobile app with Expo and Expo Router.
- Delivered frontend web features with React and Tailwind CSS, including refactoring and bug fixing.

Kanon Gaming Limited — San Gwann, Malta

Frontend Developer (React / Next.js) | Sep 2023 – Mar 2024

- Developed pages and features for online casino websites in the Swedish and Danish markets using JavaScript, React, Next.js, CSS and Firebase.
- Built back-office features to manage game provider releases.
- Refactored and tested code, fixed bugs and maintained CI workflows with GitHub Actions.

Tecnosurca (client: El Tunal) — Barquisimeto, Venezuela

Frontend Developer (Freelance) | Aug 2022 – Feb 2023

- Built user interfaces with React and CSS Modules.
- Worked on backend APIs and services with Node.js.

Edencoco Importadora e Exportadora (Brazil) & Motorepuestos López (Venezuela)

Frontend Developer Intern | 2021 – 2022

- Built web projects with JavaScript, HTML5, CSS and Tailwind CSS.

Earlier Experience — Barquisimeto, Venezuela

Java Developer | 2018 – 2019

- Lara State Government: improved a staff attendance system built in Java SE (Apr – Aug 2019).
- IUT Antonio José de Sucre and freelance: built a graduate management system for the university and an inventory management system for a client (2018).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Java

Frontend: React, Next.js (SSR), React Native (Expo), Redux Toolkit, SWR, Tailwind CSS, CSS Modules, Bootstrap, next-intl (i18n), responsive design

Backend: Node.js, Express, REST API development, Socket.io, PostgreSQL, MySQL, MariaDB, MongoDB

APIs & Data: GraphQL, REST APIs, WebSockets (MQTT), Directus CMS, Firebase

Tools: Git, GitHub, GitHub Actions, Nx (monorepo), component libraries, Postman, Jira, Confluence, Oracle Cloud Infrastructure

EDUCATION

University Technician (TSU) in Computer Science | 2014 – 2019
Instituto Universitario de Tecnología "Antonio José de Sucre", Barquisimeto, Venezuela

Course: Programming Logic and Java SE Fundamentals | 2016
CADIF1, Barquisimeto, Venezuela

LANGUAGES

Spanish (native) | English (C1, professional working proficiency)
